## Problems seeing posts. Is it just me?

Posted by TwoFish - 2008/03/20 14:08

---

Anyone else having problems opening posts? I keep getting 'fatal errors' like the one below. It's been like this for a few days, but now I'm very concerned as I can't see everyone's top tips for where to sail this long weekend.

Error:

Fatal error: Allowed memory size of 16777216 bytes exhausted (tried to allocate 710344 bytes) in /home/iwindsur/public\_html/mambots/content/mosbookmarks.php on line 421

No, I go to a strange page which allos me to reply but can't read the thread. Getting error message "Fatal error: Allowed memory size of 16777216 bytes exhausted (tried to allocate 16 bytes) in /home/iwindsur/public\_html/components/com\_fireboard/class.fireboard.php on line 1063"

If anyone can read HELP !!!!! Been going on for over a week:( :( :(

I can't even see the posts, looking at the pdf view used to work but no more?  
I'm totally cut off now :unsure:

Oooh, I've not been able to see this thread ever since first posting, but now I'm in again. Are things working again for the

---

rest of you?

Great to have access back again (if it lasts).

Back on line again for 2 days now

Anyone know what happened, did somebody forget to feed the meter ??:blink: :blink: :blink:
