
Lake Garda

Posted by Bob_S - 2008/05/21 19:53

Alright guys

I'm off to lake Garda at the beginning of June for a couple of weeks and wondering what gear to take. We'll be staying near San Felice del Benaco, near Salo on the west coast, half way down the lake where the lake gets wider - other halves choice.

I take it the stronger winds in the morning are only in the north as it funnels between the mountains, so i'll have to drive to the better spots, or could I be ok there?

I've got the choice of a 98 FSW or a Carve 162, also what size sails to take? - I can't be bothered with taking 8 between 3.7 and 9 or so with the 5 masts and 3 booms. I was thinking the FSW with a 4.5, 5.2, 5.6 and 6.6 or can i cut the 6.6?

Any ideas would be appreciated.

Cheers

Bob
