Condition and colour is the same as the 4.0 though.

Righty - now boards!!

JP Freestyle Pro Edition 91 litre

240 x 60cm - light as a feather!!

Has Dr ding on the front & rear where the gel coat chipped off (see pix) and car park rash on the sides. All these are quite minor damage. I also had the nose rebuilt professionally by Blue Chip, so it's now stronger than it was when new, thank god!

Comes with 24cm Pro Limit Hybrid fin.

<http://img696.imageshack.us/i/img3288eh.jpg/>

F2 Guerilla Wave - custom model I got off John Skye!

Bit of an unusual one this as it is not a normal run of the mill production board. It is the prototype board that the 2008 71litre Gurilla Wave was modelled on. As such it is not made from standard materials, and is unique and looks absolutely awesome on the water!

It is a f****g (pardon my French!) fabulous wave board that goes like a rocket, turns on a sixpence and will rip the hell out of any waves/chop you can throw at it, big or small!

Theres a bit of Dr Ding on the front, a bit on the bottom, oh - and a little bit on the side too, and a bit of West Kirby car park rash along the sides, but nothing major - see pix.

Comes with an absolutely wicked custom fin, as used by John Skye himself 21cm.

Size - 240cm x 53.5

Volume - it has a sticker on it saying 68 litres, but John Skye assured me it's actually 71litres. To be honest tho', it does feel more like 68 - it's not one to practice tacking on.

If you're in the market for a small board for those crazy days, look no further... works OK with a 5.0 - but loves a 4.0!!

<http://img31.imageshack.us/i/img3290ti.jpg/>
<http://img25.imageshack.us/i/img3291tc.jpg/>
<http://img715.imageshack.us/i/img3292c.jpg/>

<http://img338.imageshack.us/i/img3296p.jpg/>
<http://img85.imageshack.us/i/img3297w.jpg/>

and finally....

RDM (skinny) mast extension

Unused. 30cm. Not sure what make, but looks like a good tuff one! *EDIT - it is the Mystic extension on this link**

Hehehe - I bought my last kite to make a full quivver - while my Mrs was in labour!!! Hehe - it arrived before she & the boys got home, so I smuggled it in between the other two on the shelf and she still hasn't spotted it!!:laugh:

Slim - good to see you still trawling matey :) How's the beach life treating you - and didn't you have a new addition too?
Any hints and tips I should know about? My twiners are doing good - they are both so different - we've got one super chilled one that never makes a fuss - and the other never sleeps and goes nuts all night! They are both super though, and we can't imagine just having one now - although, bloody hell, I could use about 38 hours sleep... been getting by on about 5 hours a night for 8 weeks :blink:

Yep - i will miss having it - brilliant bit of kit - and sticks out like a sore thumb! Shame I've not used it for 2 years!! Cripes.

Yeh, feels like two years since I was out last as well!

Glad to hear your enjoying the kids.

If you need more sleep you could try what I did, persuaded the missus that as I was a bit of an ugly fecker to start with I couldn't really afford to miss out on any beauty sleep so she used to do all the night time stints. (Actually think it was probably more to do with the fact she didn't trust me to know one end of the baby from the other in the middle of the night)
