
No more COLD hands

Posted by Ianovated - 2012/10/05 09:56

Beat cold hands this winter with the new Ianovated wetsuit - the only winter wetsuit that includes a breath powered hand heating system. The system integrates with a palm-less mitten, but you can cut all of the underneath of the mitten away, so that there is nothing between your fingers and the boom either. Your bare hands grip on the boom is not disturbed. Now you will be able to really enjoy Winters better winds and bigger waves! Take a look at www.ianovated.co.uk
