
Download full windsurfing vids

Posted by nealmarin - 2006/08/30 07:03

Hi Guys,

I have just stumbled accross a video download site called totalvid.com.

For \$9.99 per month I think that's around a fiver you can download full length windsurfing dvd's to watch on your home PC.

I have just joined and downloaded Serious about waves 2 in about 20mins using a 2mb line, they have a super quick server.

You cannot copy them to dvd as they are protected but you can watch them over and over on your pc.

If you are like me and watch a dvd then put it away for months then this could save you a fortune as you can watch unlimited vids for the one price.

There are tons of other vids too kiteboarding skating etc etc + guitar/fitness all sorts.

worth a look and a free trial is available for 7 days so you can test the speed and quality without paying a penny.

Neal.

Ive used totalvids a few times. the files do have a time limitation on them.

I suppose it could be possible to output the vid through your computers video output and rerecord the video so avoiding the time limitation.

but that would not be legal :blush:
